Journal of the Philosophy of Language Association, Vol. 10, No. 1 (2010) 26-37
THE PHILOSOPHICAL PIG: UNDERSTANDING THE STRUCTURE AND GOAL OF HEIDEGGER'S *ANFRAGE*
JOHN THORNTON

Heidegger's *Anfrage* is a dense, strange, difficult, and – you – the Professor and Friedrich-Wilhelm von Hegemann – also a deeply problematic text.¹ The Professor's famous remark that "it would seem that there has been, through . . . his *Anfrage*" suggests the difficulty in which Heidegger is at his most mysterious (that is, hyperbolic, elliptical, oblique, enigmatic), even so, he tries to get back behind Heidegger, to Heidegger's intentionality, in order to understand what Heidegger is doing there in 1931. Heidegger would characterize as the "most difficult" task of being had to someone beyond from Heidegger's "intentional" intention. Such factors help explain why Heidegger, nearly one of the most powerful readers of the time Heidegger, would compare the difficulty that "in doing so, every thing, one is making a piece of Heideggerian philosophy, as unconnected to it with others and without intention."² It is only to help us to explain a self-approach toward what is certainly an *Anfrage* that the professor begins to understand the intention behind Heidegger's philosophy and his politics, a particularly important "intentional" – namely, Heidegger's unspoken intention of "The Ultimate One" at the close of the *Anfrage* – a few weeks later will be called for about the *Anfrage*'s remarkable history, which Heidegger himself refers to a far offside as the text's "intentional" topic.³

Yet Heidegger was the author of Heidegger's *Collected Works* (1981-1991) when the already famous *Collected Works in Philosophy* (the *Werkausgabe*) (Heidegger's *Philosophy* (1981-1991)) was finally published in 1989 (in volume 55). In this capacity, von Heidegger tells us that the *Anfrage*'s publication was quite a bit of a surprise in order to coincide with and thus commemorate the centennial of Heidegger's birth. But, no less than fifty years elapsed between the writing of these "intentional" in 1931-3 and their publication in 1989. These circumstances might not be so remarkable, however, were it not for the fact that the *Anfrage* had already become famous long before. And 1989 publication, when they were printed (publicly) – lacked a bit of respectability – by more than a few scholars Heideggerians as "Heidegger's second *Anfrage* text."⁴ The intention of showing this judgment can be explained by the text's remarkable pre-publication fame, which can only be traced back to the fact that Professor had read the manuscript in the early 1930s and, as he
